Lighting the way to pain relief!

Looking for pain relief?

- Do you suffer pain due to a sports injury or accident?
- Are you suffering from repetitive stress injuries such as carpal tunnel syndrome?
- Do you take pain medications more than three times a week?
- Have you been awakened by pain?

If you answered yes to any of the above then **you** may benefit from laser therapy! Many acute and chronic conditions benefit from laser therapy including:

Migraine Headaches
Tendonitis
Sprains & Strains
Soft Tissue Injury
Arthritis
Burns
Tennis Elbow
Fibromyalgia
TMJ
Carpal Tunnel Syndrome
Chronic Pain

What is Laser Therapy?

The cells in the human body need energy to communicate. Spectra Therapy's Low-level laser supplies energy to the body in the form of non-thermal photons of light. When low level laser light waves penetrate into the skin, they stimulate the cellular metabolism, this has both anti-inflammatory and immunosuppressive effects. Research worldwide has shown that low level laser light helps restore balance, energy, nutrient and oxygen permeability to sick cells. Laser light penetrates the surface of the skin with no heating effect, no damage to the skin and no known side effects. Rather, laser light directs biostimulative light energy to the body's cells which the cells then convert into chemical energy to promote natural healing and pain relief.

Safe light energy that helps relieve pain!

How can it help me?

Treatments with the Spectra Therapy Laser can:

- Relieve pain
- Aid in the reduction of swelling and promote faster healing after injury or surgery.
- Promote participation in other physical therapies by keeping patients more comfortable.
- Reduce dependency on chemical pain relievers.

Ask your Doctor today if Spectra Laser Therapy would be right for your pain. A home unit may be the key to your pain relief.
